“From a region of barriers to a region of flows”

Danube Region Programme

AE Budapest Knowledge Hub webinar
8 February 2024
online
Programme area
DRP supports joint territorial cooperation projects:

- **Addressing concrete transnational territorial challenge** (as clear starting point)
- **Develop institutional capacity** and ensure **knowledge transfer**
- Support the development of a **common framework for policy implementation** in various fields
- Support **policy harmonisation** in various fields
- Develop **innovative solutions to common problems**
- Pave the way to new investments

What is financed?
**transnational dimension:**

- project topic, addressed challenge and contributing project activities have transnational, broader territorial and/or thematic character and relevance

**transnational impact:**

- based on the planned activities and outputs the impact of the project can be considered relevant on transnational scale and not only on local level in different parts of the region

- not limited to few (3-4) countries

- ≠ cross-border

- ≠ local actions under international umbrella
What activities are financed?

- **improving policies and institutional capacities** (e.g. joint strategies, action plans, policy & sectoral dialogs, networks, trainings)
- **developing solutions** (e.g. tools, methods, processes, services, database) that are also pilot tested within the project
- **pilot actions** (testing demonstrating viability and applicability of solutions)
- **Information, communication, dissemination activities** (supporting the thematic activities)
- **transnational small-scale investments** (no major infrastructure)

*reasonable mix of activities with clear thematic focus*
Programme does **not finance projects** with:

- **pre-dominant focus on research** / data collection without translating into applied solutions / policy strategies, plans
- **pre-dominant focus on technical solution development** without application by target users
- **pre-dominant focus on infrastructure**
